

The cortical column as an AM radio receiver

AM field $s(t)$

carrier f_c
envelope Ω

RF signal

**Nonlinear
detector**

firing-rate sigmoid
 $\sigma(v)$, curvature σ''

*square-law /
diode detector*

**Tuned
resonator**

2nd-order synapses
near Hopf, f_0

*RLC tank
(tuned)*

**Demodulated
output @ Ω**

alpha rhythm
recovered
